3.9	управление версиями git . . . . .	12
3.10	сайт . . . . .	13

## Список таблиц

# 1 Цель работы

Научиться оформлять сайт, менять информацию о себе и создавать несколько постов.

## 2 Задание

Добавить к сайту данные о себе:

1. Список добавляемых данных. а) Разместить фотографию владельца сайта. б) Разместить краткое описание владельца сайта (Biography). в) Добавить информацию об интересах (Interests). г) Добавить информацию от образовании (Education).
2. Сделать пост по прошедшей неделе.
3. Добавить пост на тему по выбору: А) Управление версиями. Git. Б) Непрерывная интеграция и непрерывное развертывание (CI/CD).

### 3 Выполнение лабораторной работы

1. Необходимо добавить на свой сайт личную фотографию, делаю это через файлы в папке blog.

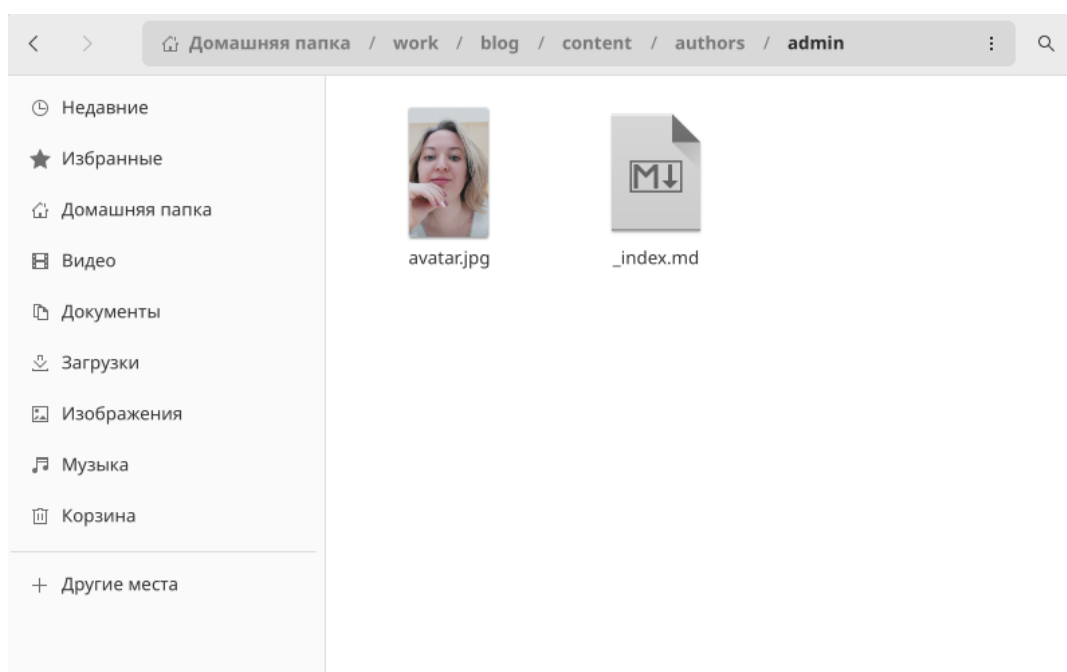

Рис. 3.1: фото

2. Добавляем информацию о себе: своё имя, вуз, краткая биография.

4
5 # Summary for listings and search engines
6 summary: This chapter will be about getting started with Git. We will begin by explaining some background on version control
7 tools, then move on to how to get Git running on your system and finally how to get it set up to start working with. At the
8 end of this chapter you should understand why Git is around, why you should use it and you should be all set up to do so.

45
46 ## Overview
47
48 About Version Control
49
50 What is “version control”, and why should you care? Version control is a system that records changes to a file or set of
51 files over time so that you can recall specific versions later. For the examples in this book, you will use software source
52 code as the files being version controlled, though in reality you can do this with nearly any type of file on a computer.
53
54 If you are a graphic or web designer and want to keep every version of an image or layout (which you would most certainly
55 want to), a Version Control System (VCS) is a very wise thing to use. It allows you to revert selected files back to a
56 previous state, revert the entire project back to a previous state, compare changes over time, see who last modified
57 something that might be causing a problem, who introduced an issue and when, and more. Using a VCS also generally means that
58 if you screw things up or lose files, you can easily recover. In addition, you get all this for very little overhead.
