Научиться добавлять к сайту достижения, список достижений (о навыках (Skills), об опыте (Experience), о достижениях (Accomplishments)).

1. Необходимо добавить к сайту достижения. Начинаем с skills.

```
1 ---
2 # Leave the homepage title empty to use the site title
3 title:
4 date: 2022-10-24
5 type: landing
6
7 sections:
8   - block: about.avatar
9     id: about
10    content:
11      # Choose a user profile to display (a folder name within `content/authors/`)
12      username: admin
13      # Override your bio text from `authors/admin/_index.md`?
14      text:
15   - block: features
16     content:
17       title: Skills
18       items:
19         - name: Programming
20           description: 90%
21           icon: r-project
22           icon_pack: fab
23         - name: Books
24           description: 100%
25           icon: chart-line
26           icon_pack: fas
27         - name: Photography
28           description: 10%
29           icon: camera-retro
30           icon_pack: fas
```

2. Добавляем Experience.

```

27   - name: Photography
28     description: 10%
29     icon: camera-retro
30     icon_pack: fas
31 - block: experience
32   content:
33     title: Experience
34     # Date format for experience
35     # Refer to https://wowchemy.com/docs/customization/#date-format
36     date_format: Jan 2006
37     # Experiences.
38     # Add/remove as many 'experience' items below as you like.
39     # Required fields are 'title', 'company', and 'date_start'.
40     # Leave 'date_end' empty if it's your current employer.
41     # Begin multi-line descriptions with YAML's '|2-' multi-line prefix.
42     items:
43       - title: student
44         company: RUDN University
45         company_url: ''
46         company_logo: org-gc
47         location: Moscow
48         date_start: '2023-02-01'
49         date_end: ''
50         description: |2-
51           Responsibilities include:
52
53           * Analysing
54           * Modelling
55           * Deploying
56       - title: programmer
57         company: company - Z
58         company_url: ''
59         company_logo: org-x
60         location: Moscow
61         date_start: '2022-01-01'
62         date_end: '2022-08-08'
63         description: programming
64
65     design:
66       column: '2'
```

3. Добавляем Accomplishments.

```
58     company_url: ''
59     company_logo: org-x
60     location: Moscow
61     date_start: '2022-01-01'
62     date_end: '2022-08-08'
63     description: programming
64   design:
65     columns: '2'
66 - block: accomplishments
67   content:
68     # Note: '&shy;' is used to add a 'soft' hyphen in a long heading.
69     title: 'Accomplish&shy;ments'
70     subtitle:
71     # Date format: https://wowchemy.com/docs/customization/#date-format
72     date_format: Jan 2006
73     # Accomplishments.
74     # Add/remove as many 'item' blocks below as you like.
75     # 'title', 'organization', and 'date_start' are the required parameters.
76     # Leave other parameters empty if not required.
77     # Begin multi-line descriptions with YAML's '|2-' multi-line prefix.
78     items:
79       - certificate_url: https://www.stepik.org
80         date_end: ''
81         date_start: '2022-01-25'
82         description: ''
83         organization: Stepik
84         organization_url: https://www.stepik.org
85         title: course completion certificate
86         url: ''
87
88     design:
89       columns: '2'
90 - block: collection
91   id: posts
92   content:
93     title: Recent Posts
94     subtitle: ''
95     text: ''
96     # Choose how many pages you would like to display (0 = all pages)
97     count: 5
```

4. Каким образом все это выглядит на сайте.

[сайт] (image/эт34.png){#fig:004 width=90%}

5. Добавляем пост по прошедшей неделе.

```

46 ## Overview
47
48 Last week I visited one of the most beautiful parks in Moscow - Victory Park. That is why it is necessary to
49 tell a little about him. After all, a walk in this place was an important event of the past week.
50
51 Victory Park is a large memorial complex dedicated to the victory in the Great Patriotic War. It is often
52 called Poklonnaya Gora, after the name of the historical area in which the park is located. In Victory Park,
53 folk festivals are held on holidays, newlyweds come here to lay flowers at the memorial, and the townspeople
54 and guests of the capital rush here just to take a walk, ride roller skates and bicycles, and look at the
55 fountains.
56
57 In the Museum of the Great Patriotic War - the main object of the entire complex - in the "Book of Memory"
58 department, almost 1500 volumes of Books of Memory are stored, in which the names of the fallen soldiers are
59 inscribed.
60
61 The main alley is decorated with 1418 fountains - so many days the war lasted - located on five water terraces
62 - each of them personifies the year of hostilities.
63
64 In the center of the Victory Park there is a 141.8 meters high stele. At the top of it is a statue of the
65 goddess Nike. At the foot of the obelisk is a sculpture of St. George the Victorious slaying a serpent with a
66 spear.

46 ## Overview
47
48 Markdown, or markdown, is a markup language for text documents. It allows you to create texts without using
49 Word and other editors. The markup can be read and rendered on any system or browser.
50
51 Markdown was created by writer and blogger John Gruber along with web activist Aaron Schwartz. They wanted to
52 come up with the simplest and most convenient markup language with which text can be translated into a
53 beautifully designed look. At the same time, the text must remain readable even without being reduced to a
54 "beautiful" look. This is what Markdown turned out to be. It was created in 2004, but the language has gained
55 the most popularity now. It is supported by a variety of blogging platforms, note-taking services, CMS, and
56 even instant messengers. Therefore, markdown is useful for everyone who deals with the web, from developers to
57 bloggers.
58
59 How to use the markup language
60
61 A person writes text in any editor and adds special combinations of standard characters to it. This is the
62 markup, it shows where the text should be bold, where the heading should be, and where the list should be.
63 Symbols can be used to mark up headings, text highlights, and even complex structures like tables. Special
64 converters form a finished document based on the markup. It's similar to using HTML, but the markdown is
65 simpler and the text is more readable. Converters are either pre-installed in a text editor, such as a note-
66 taking app, or are downloaded separately.
```
